**MORE SERVICE!
AT THE COMPANY X-FLOC**

SERVICE MADE BY X-FLOC

X-Floc insulation blowing machines are designed and built based on the latest state of the art technology with all the recognized safety and security requirements.

A regular and professional care and maintenance of the machine minimizes the machine's downtime, ensures a constant good performance and can significantly extend the machine's lifetime. Rely on the years of experience of our qualified professionals who are ready to perform all the necessary works at your machine in a quick and professional way in Renningen or book our service technician for a visit at your business location.

Service at X-Floc

Bring or send us your insulation blowing machine or let us organize the machine's transportation. Contact our customer service team or use the maintenance/repair order (see website) in order to set a date.

Service on-site

If desired, our service technician will visit you at your business location. Contact our customer service team or use the service order (see website) in order to ask for an individual offer. However, in worst case, we offer to take parts/machines back to us in order to send them back after repair.

At irregular intervals, we organize service tours in pre-defined postcode regions. In this case, we will inform you directly. If you are interested, feel free to contact our customer service team for more information.

Scope of maintenance

Checking the insulation blowing machine, including pressure test, air filter, blower units, hose lines, check valves, rotary airlock, drive elements for airlock and conditioning unit, bearings and gaskets.

Scope of maintenance electrical switchboard

Checking the electrical equipment, including control voltage, power circuit, speed controller and drive motors, renewal of the obligatorily retest according to the accident prevention regulations (UVV) for mobile machinery according to DGUV 3/BGV A3 (basic standard VDE0113) including attaching a new test badge.

Package price for all insulation blowing machines: **195,84€**

The package price does not include the necessary spare parts as well as travel and freight costs. In case of larger defects, we will inform you before carrying out any repair works (all prices plus statutory value-added tax).

As a matter of course, we will perform maintenance and repair works at machines by other brands.
