

D1000 Plus Hose Reel

Greater Working Comfort with an Integrated Hose Stand

www.x-floc.com

- Lightweight and compact
- Remarkable reduced setup times
- Quick and tidy storage
- Large storage capacity
- Reel-lock function
- Connection side exchangeable
- Fixation to the floor or wall possible

Flexible and space-saving for winding up and unwinding your hoses.

A locking device ensures that your hoses do not unwind when being stored. Note: the capacity of the hose reel depends upon the hose type used (see table).

With an integrated hose stand your hoses are ready for use with minimal set-up times, and are quickly and easily tidied away ready for the next job.

The connection side of the hose reel can be changed very fast.

The hose reel can be fitted easily inside construction site vehicles, on trailers, or at the warehouse. Regardless of their function, with the hose reel your hoses are always ready for use and stored properly in the right place. Setup times can also be reduced to a minimum.

The hose reel can be fitted with castors for increased mobility. It is made of high-quality powder-coated steel with bush bearings.
